

-- In another preferred embodiment, the enhancer element comprises nucleotides 14760 to 15091 as shown in Figure 11 (SEQ ID NO.1) or a sequence which hybridizes thereto under high stringency.--

Please replace the last paragraph of page 6 continuing on to page 7 with the following rewritten paragraph in its place.

-- In a fourth aspect the present invention provides an isolated nucleic acid molecule, the nucleic acid molecule having enhancer activity and comprising

(a) a sequence comprising nucleotides 14760 to 14930 as shown in Figure 11 (SEQ ID NO.1), or

(b) a nucleic acid sequence which hybridizes under high stringency to the sequence defined in paragraph (a).--

Please replace the first full paragraph on page 7 with the following rewritten paragraph in its place.

-- In a preferred embodiment of the fourth aspect, the isolated nucleotide molecule comprises

(a) a sequence comprising nucleotides 14760 to 15091 as shown in Figure 11 (SEQ ID NO.1), or

(b) a nucleic acid sequence which hybridizes under high stringency to the sequence defined in paragraph (a).

Please replace the second full paragraph on page 20 with the following rewritten
